DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 168-173 and 187-190, drawn to a primer comprising an acidic solution, classified in class 514, subclass 2.
- II. Claims 174-180 and 191-195, drawn to a primer comprising a protein cross-linker, classified in class 530, subclass 300.
- III. Claims 181-186 and 196-201, drawn to a primer comprising a fluorinated compound, classified in class 424, subclass 444.

Inventions of group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). Inventions of group I and II are distinct and/or independent, one from the other because the primers are composed of materially different elements.

Inventions in groups II and III are distinct and/or independent, one from the other because the primers are composed of materially different elements.

Inventions in groups I and III are distinct and/or independent, one from the other because the primers are composed of materially different elements.

Art Unit: 1654

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
